DIRECTORS TALK ON DALY WEST

Straws That Indicate Cut in Dividend -The Mines in Finest Physical Condition

While declining to anticipate the action of the board as a body at its regular session on May 5th, an interview with Tmiy West officials now on the ground indicates, quite decisively, a reduction in the dividend. For this the street has been prepared for me time, while confessions yesterday indicate that the last increase lacked, considerably, the unanimous approvaof the shareholders. That it was no approved by all, notwithstanding the universal lust for ready money and the eagerness of the average man to pile up a fortune was revealed in letters to the board, said an official, but it had been ordered and, "indeed, there was nothing else to which to apply a surplus that had reached \$450,000. The board, or a majority of it, believed the shareholders entitled to it and so the

Increase was ordered."
Vice-President J. D. Wood, whose attention was called to the damaging stories and ridiculous extremes to

"Unless there is some weakness abou the mine of which I know nothing the dividend will certainly not be reduced to 35 cents a share with my con sent. I know nothing to the discredit of the mine and if it is cut at the next meeting a statement will be issued that cannot but elicit the approval of the stockholders. I buy, if it is cut, in that I have not discussed such a proposition with any member of the hourd of dis-I have not discussed such a proposition with any member of the board of directors. I have not had an opportunity, in fact, for have been home but a short time and most of that time has teen spent in bed."

Discussing the future policy of the management, Vice-Fresident Wood said to might be to extract less first-class.

management, Vice-Fresilent Wood said it might be to extract less first-class ore, relying to a greater extent on the milling ores, and while the shareholder will receive the same amount of money it will be during a longer period. The epistruction of a slines-plant, a lack of water and bad roads have no doubt reduced the carnings and made it necessary to encroach upon the surplus, said the vice-president, but this has wrought nothing that invites anology.

dent, but this has wrought nothing that invites apology.

Ezra Thompson, a member of the heard of directors, said:

"The dividend may be reduced, but I have heard no director express himself, nor have I any personal information that there is any need of reducing It. I don't want to be understood as saying that such a need may not exist-simply that I have no knowledge of it. I have not been to the milne for simply that I have no knowledge of it. I have not been to the mine for some time, but I am told that its physical condition is good. Indeed a mining man of Park City in whose ability and integrity I have unlimited confidence, assures me that he was astonished at its resources, and I know positively that he has been buying since his examination. Of course there has been trouble in the transportation of the ores and a lack of water with which to supply the mill, while we have been at considerable expense in the construction of a slimes-plant, but there is no reason to believe other than that the earnings will soon be restored to the normal. However, I don't want to be quoted as saying anything that will influence the investor."

W. S. McCornick, treasurer of the company, when asked if he would urge

company, when asked if he would urge a reduction in the dividend, replied:

"As I opposed the increase certainly I shall not antagonize any proposition to reduce it. I believed when 50 cents a share was reached that we had about reached the limit of discretion, no matter what the resources of the mine, for the reason that under such a policy the cureer of Daly West as a dividend-payer would have been pronotice the career of Daly West as a dividend-payer would have been prolonged and its general welfare more settled. There is no question that the more there is extracted the less there is left, but my information concerning the physical condition of the property is all favorable to it, and relying upon that information I have not disposed of a share. Indeed, I might be justified in repreaching myself that I did not sell take the scalp and buy in again, but I didn't. On the contrary, I have added to my holdings since the stock broke below \$30. Certainly there is nothing at the mines to justify the general alarm by which the market has been depressed, but if 50 cents as a dividend was enough when I opposed the dend was enough when I opposed the increase it is enough now, and yet, with the misfortunes that have crippled the output overcome, the earnings ought soon to be at the cormal." The directors will meet on May 5th, when official action is expected. Mean-

while the talent will continue to specu-late on the extent to which the reduc-tion in the dividend shall be made. However, information concerning the physical condition of the mine is all very favorable to it, while the earnings of the mills should be materially in-

STUDYING NEW METHODS AT NEW BINGHAM

W. C. Thomas, smelter authority on the Newhouse staff, has returned from Bingham, where he inquired into the methods and devices that are being employed in the milling and the smelting or oves, and while these observations may not be in the interest of Boston Cox., some of whose officials are urging a smelter, it is at least significant. With methods in use at the Utah Copper company's plant Mr. Thomas was most favorably impressed, the simplicity with which the purphyries are city with which the porphyries are treated and made to surrender their wealth of copper, to him a most inter-esting development in the field of met-allurgy. Of results there can be no doubt, in the opinion of Mr. Thomas, while mechanically the equipment is absolutely flawless. At the Yampa he reports the management operating its initial furnace with very satisfactory results, while preparing for charge-ments and while both are in the cate-gory of "youngeters," each now appears to be providing means with which to pay its own way. Today Mr. Tho-mas leaves for the Ohio Copper comany's mill, from which concentrates of good quality are coming regularly.

STOCK MARKET WAS

AGAIN UNSETTLED

The week on the mining exchange opened on the sale of 18,700 shares of stock for 5650-46, and with the market generally unchanged. Daly West, which came out reluctantly to a bid of \$22.75 at the morning session, responded readily to \$22 at the afternoon opening and then ralled to \$22.5, with Grand Central changing hands at \$4.90. Con, Mercur was slaughtered and flattened out to \$25, while he package of 1000 was being disposed of, while Century was towed in at 335, not-withstanding the distribution of \$300 which is to be made in the next few bours. Yankee, which is again loading cres of good quality was soft and sold at 30 cents, while Tetro filled an order at 31 cents, and Lower Mammoth at 285, the day closing on the following market; he day closing on the following market. Boston Copper Market.

Roston Copper Market.

(Reported by Horablower & Weeks, Brokers, Boston.)

Ers, Boston.)

BOSTON. Mass. April 18.—The little business that was done in Boston today was mostly the result of sales by tired holders who prefer to be out rather than held stocks in a dull market. Prices where sales were made were moderately heavy, but the losses were mostly fractional. Traders were not inclined to do anything, preferring to keep out over the holiday tomorrow. The early prices were firm, but the market soon became exceedingly dull, with prices inclined to sag.

The Copper Market.

The Copper Market.

Hayden, Stone & Co., in their Bosion circular, say: "The copper market condinues very strong with very healthy buying by consumers and for export. This week has witnessed several thousand tons of electrolytic bought for European shipment, and consumers at home have bought 2000 tons for delivery during the next three months on a 12c cosh basis, Lake is now being held at anywhere from 13456135c, and electrolytic cannot be bought under 134c. Of course, the bolidays during the first part of the week were so generally observed in Europe that business slackened at the beginning of the month; still, thur is no reason to suppose that foreign requirements have been supplied for the present."

Ores and Bullion

Ores and Bullion.

In the ore and bullion market the week opened with settlements amounting to \$138,200. McCornick & Co. reporting them as they follow: American bullion, \$2500. gold bullion, \$2500. gold, silver, lead and copper ores, \$2,200.

In the metal market silver ruled at \$342 cents an ounce, lead at \$3.50 per hundred pounds, and casting copper at 12% cents a pound.

WEALTH OF ASPHALT IN COWBOY LEDGE

Eighteen Feet of the Hydro-Carbon Now Ready to Respond to Market's Needs.

S. P. Barron, vice-president and general manager of the American Asphalt association's gilsonite mines on the Uncompaghre reservation, came in from camp Sunday and yesterday departed for the general offices of the association at St. Louis. The development of the great Cowboy ledge, over which there was so much rivalry for many years prior to concessions from the redskins, which gave the association possession has been with astonishing results said Manager Barron, a cross-cut re-vealing no less than eighteen feet of gilsonite, of which about 2500 tons has been marketed during the past six months. At present, however, there is no desire to levy upon its resources as the line of railway from Rifle into the region which materially reduce the cost of transportation and do away with the train of wagons and army of team

now employed.

The Moffat line, said Mr. Barron, will open up a country of marvellous resources and now that it is assured greatly increased development is assured. Manager Barron, who was the guest of Judgs McConnell during his stop in town, will return to his camp a month later.

THE ACTIVE MOVING OF BINGHAM ORES

Over the tracks of the Copper Belt railway at Bingham there was yesterday forwarded by Superintendent Van Housen two dozen carloads of copper, gold and silver-bearing ore to the various tables and furnaces and yet the capacity of his machines was not reached. To inspect the line President William Bayly, who has arrived from Les Angéles, will leave for camp this morning, prepared to undertake any-thing further in the line of equipment that the customers may require. A telegram during the day informed Manager Bayly that the big engine built at Lima, O., had reached Omaha on its way to camp, and that from that point it would be rushed through. However, the condition with the present ever, the condition with the present machines doing their work and the roadbed settling down to a permanent ballast, is a most comfortable one.

BLACK DIAMOND GETS A MILL CONTRACT

On terms that cannot be other than sat isfactory to all interests, Manager Joseph Dederichs of the Black Diamond of Stockton yesterday effected a contract with the ton yesterday effected a contract with the management of the Honerine which will enable it to reduce the output of second-class ore at the new mill while the first-class will find its way to the lead blast furnaces of the valley. At the same time a franchise was obtained by the Black Diamond which afferts it the use of the main tunnel in the forwarding of its ores at a reasonable tolt. This does away entirely with the haul by wagon that formerly eneroached so largely upon the earnings. It has been decided to raise from the tunnel level to the main workings above, and to do this intelligently survey was begun from the tunnel vesterday. The work will be rushed, said Manager Dederichs, from the lundle above and the raise below that it may be completed in the shortest time possible.

THE STORY OF OIL WAS A RANK CANARD

A report that a flow of oil had been developed twenty miles out on the line of the San Pedro during the day was too reminiscent of the stattering strikes of former days to mislead only the most credulous, and was soon branded. Those who investigated it did so to learn that there was not even a bore

in progress.

To inquire into the local campaign C. To inquire into the local campaign C.

A. Dorn, representing the Oil Supply company of Pittsburg, arrived in town during the day via Evanston, Wyo., where developments have been prosecuted with commercial results. Mr. Dorn has always viewed the prospects in Salt Lake valley most favorably and he is relying on it for a verification of his belief as soon as the proper depths have been fathomed.

MR. LANGLEY ARRIVES FROM TONOPAH MINES

The troubles that momentarily encum bered the Topopah Anaconda having all been adjusted and a contract let for lo feet of sinking, J. W. Langley, the brokfeet of sinking, J. W. Langley, the broker and mining man, came in from the west yesterday. With the new railroad affording easier means of getting in and out of camp, while emphasizing the permanency of the camp's wealth, many are now returning to its digglings, said Mr. Langley, and the year promises an estonishing increase in their output. The developments have been generally systematic from the start, and with properequipment there should be an enarmous tonnage comining from that source to the smelters of the valley the present year. It is the intention of Mr. Langley to push work on the Anaconda group, with the assurance of all who have experted it that it is the making of a producer,

THE TRIBUNE NEWS STANDS NEW LEAD OUTPUT

OF THE HONERINE

tunnel at the Honerine of Stockton has increased to 8000 gallons per minute, with the recession of waters in the various workings upon the zone being correspondingly reduced, said Manager Snyder yesterday. Indeed, the behavior of the element by which the world has for so long been deprived of the wealth of that zone is decidedly gratifying, and the present month should witness the draining of all openes to their bottom.

The mill is now producing about orty-two tons of concentrates every exteen hours, with the third shift to e put on Thursday, the management cfore the close of April expecting to acrease the output to seventy-five tons of concentrates, or from thirty-seven to forty tons of lead daily. Meanwhile provision is being made for five more tables and two additional slimes, with verything to denote a steady increase

LOT OF MAJESTIC ORE IN THE OPEN MARKET

Majestle company's properties out of Milford made it appearance on the open narket yesterday and was sold on controls showing 6 per cent copper, 4.6 ounces silver and \$3.20 gold per ton. The lot, which consisted of 75 tons, while not the best the company has in stock, will afford a small margin. It was said yesterlay that the forwarding f ores would now probably cease as the proceedings in involuntary bankruptcy are scheduled to come up in the Federal court tomorrow. Indications, however, point to another continuance as the is occupied on the criminal cal-

SUE FOR \$6,000,000 IN MINING PROPERTIES

Mines Located in Eastern Oregon, and Controlled by Iron Dyke Railroad Company.

PORTLAND, Or . April 18.-Suit for eastern Oregon mining properties valued at 15,000,000 was instituted in the United States District court today by the Iron Dyke Copper Mining company of South Dakota. The suit is directed against the iron Dyke Railroad company et al. The Iron Dyke Railroad company is a

Haker county, Or., corporation, whose principal stockholders are residents of Eric. Eric county. Pa. In the bill in equity oled against them the plaintiffs ask for damage to the amount of \$6,500,00, or the mining property which it alleges belongs to it, and which is in the control of the

The mining property named in suit fol-ows: The Iron Dyke mine, Schiey mine, thafter mine, Sampson mine, Copper flant mine, Madie and Violet quartz laims, the Iron Dyke tunnel site and the claims, the Iron Dyke tunnel site and the Northwest railroad. In addition to this restoration of all the ores from the mine, or the value thereof, is prayed for. All the properties named are within five miles of Baker City, and form one of the richest groups of mines in castern Oregon.

These mines and the persons and construction when es named have been in litigation since and the present suit is the outgrowth

THE SCRAP IN THE ILLINOIS HOUSEHOLD

John C. Sullivan, manager of the Raymond-Illinols, who came up from Tintic yesterday morning, says that until the Illinois delegation adjusts its sollt and behaves Itself active operations will not be resumed. Commenting upon the allegations of the minority that it was entitled to more than had been allotted it in the amalgamation, Manager Sullivan said it had evidently overlooked the fact that the Raymon had expected some money in dropping a shalt down to a depth of 1500 feet and opening up the territory for intelligent prospecting. Again he mentioned that the Illinois company had been afforded opportunity originally to pay half the cost of this exploratory work, and to come in on an even-cut basis. This was rejected, he explained, and it was then the majority embraced the very reasonable proposition held out to it. It reasonable proposition need out to the was said yesterday that the majority was said yesterday that the majority will adhere to its position that the basis of consolidation was fair and again, 6c pound 'Phone 61 your call, AMERICAN LAUNDRY.

CONTINENTAL-ALTA TO INSTALL A LABORATORY

To facilitate experiments on ores rom the Continental-Alta of Alta Maniger Crowther has decided to install laboratory in town and to that end has secured a lease on a room at 379 has secured a lease on a room at 30 South Main street. This will be efficiently equipped at an early day, and to determine the most economic means for the reduction of such ores as are not forwarded direct to the furnaces experiments will be inaugurated. Superintendent Scott, who was down from the mines during the day with samples of copper-bearing sulphides encountered in Grizzly ground about ten samples of copper-bearing sulphides en-countered in Grizzly ground about ten days ago, says he has now followed them down ten or twelve feet, and that everything is favorable to permanency. Samples show 4*per cent copper, with about 6 in gold and silver. The new ore occurs on the contact between the porphyry and granite, and as this is the first prospecting in the contact the defirst prospecting in the contact the de-velopment is exciting much interest.

EMERALD SHAREHOLDERS ELECT NEW OFFICIALS

The shareholders of the Emerald Mining company at the adjourned meeting elected the following officers and directors; W. F. Wells, president; C. H. McMahon, vice-president, L. H. McMahon, vice-president, J. B. Ogleby, secretary and treasurer; G. L. Gundt, manager; these, with H. C. Hoffman, to serve as directors. At the meeting the articles of incorporation were amended that a minority may adjourn the meeting in the absence of a consum, while the company is authority. quorum, while the company is author-ized to lovy assessments although there remains in the treasury stock on which a previous fevy is unpaid. The com-pany enters its new anniversary with about \$1900 in the treasury and with ing than at any period in the past.

GARDNER INSPECTS PIOCHE-NEVADA

With samples of ore that afford most conclusive evidence of the wealth of ledges owned by the Ploch-Nevada company out of Ploche, Frank L. Gard-ner has returned from camp. These samples were taken from a new disclosure in the bottom of a shaft row at a depth of forty-five feet and which re-vests a solid body of it. With the properties throughout Mr. Gardner is mos favorably impressed. There is mor activity in the old region which ha been so productive, than at any period in many years and with the railrost at camp it should repeat the history o

Tonopah Stock Sales.

Saturday's transfers on the San Fran isco board were recorded as they follow: MacNamara, 1100 at 16c; Tonopah. Beimont, 1600 at 66c; 300 at 59c, seller thirty days; Midway, 500 at 36c.

Mining Notes.

Hon. David Evans has returned after is trip around the world, and will again pply himself to various mining interests President Franklin of the Gold Develop-nent company will leave Philadelphia for thicago the present week, on his way

Purchasing Agent McSpadden of the Utah Copper company spent his Sabbatt at Bingham, where he was highly in-

P. W. Madsen, manager of the Century f Park Valley, has returned from camp-ringing with him gold buillon of the aduc of \$550.

George H. Robinson manager of the Tintic Mining and Development com-pany's properties, has returned from the Yampa smelter.

Manager M. M. Johnson of the Cactus group of mines says the main tunnel on the properties was advanced 112 feet last week, with the gap between the two head-ings closing up rapidly.

Manager Walter Orem of the Utah-Ape of Bingham says that by tapping the dedges of his property through the Cor-mandel tunnel he expects to add 50 p-cent to the tourispe of ore.

Manager Joseph, who has been inspect-ing conditions at the Silver Shield of Bing-ham, says the first ledge in that ground will be tapped by the main tunnel within 100 feet from its present breast.

The Utah of Fish Springs will today market forty-five tons of ore on controls showing 1165 ounces silver, with 51 per cent lead. A letter from the property reports everything in fine form underground. A washout in Markham gulch, Bingham, renders it impossible for the Butler-Liberal to forward its ores at present. The interests in that locality believe it the duty of the County Commissioners to aid in the improvement of the road, as they are providing employment for a large number of persons.

BASEBALL and GLOVES or MASK.

61-63-65 MAIN STREET.

That Boy's Suit was never bought here-or it wouldn't act that way. Our Boys' Suits are built to stay. Mora mothers than we can count depend on this store for their Boys' Clothing-rightfully, too, for nowhere is there a more carefully prepared lot of Clothes for the boy-nowhere are prices fairer. The styles are always right up to the minute. The boy feels a pride in his garments, if they come from here. Double Breasted, Single Breasted Vestee, Yoke, Norfolk, Blouse, and all the late styles. Suit \$2.00 to \$8.00. Not a price but what is right.
